

Enterprise Services.

Enterprise
Services

We provide first class technical services, built upon ability, delivered through excellence, right at the core of your business.

About us.

Sudlows is an award winning technical services specialist formed around 3 core divisions; Critical Infrastructures, Enterprise Services and Facilities Management. Founded in 1912 the company has been the provider of choice for M&E and IT Projects for over 100 years.

We are proud to employ the industry's most dedicated, talented and passionate staff to design and build creative, sustainable and energy efficient solutions. We believe in providing excellence across every aspect of the business and our team are at the core of this vision. Here at Sudlows we pride ourselves on our knowledge, dedication and quality, reflected through our awards, accreditations, associations and extensive client list.

Connectivity.

With our teams of highly trained and fully qualified engineers we are able to provide a reliable and first-class service.

Our Enterprise Services division creates advanced connectivity infrastructures that ensure we are building environments for the future.

We design and build unified connectivity systems for both active equipment and structured cabling. With our teams of highly trained and fully qualified engineers we are able to provide a reliable and first-class service that's tailored to any business infrastructure and environment.

Sudlows products are sourced from a wide range of vendors and partners, allowing us to deploy an extensive portfolio of technologies and install innovative technology solutions of the highest quality.

Our engineers are supported by our experienced and dedicated operations team 24/7, allowing us to manage your connectivity project from design to installation and management.

Fibre.

We provide reliable, resilient and sustainable fibre networks to clients across the United Kingdom.

Sudlows' extensive experience and knowledge enables us to develop an accurate understanding of your network requirements. Our capabilities span campus environments, data centres, external networks, industrial and automotive facilities, showcasing our unique and diverse service offering.

Sudlows' highly trained fibre teams have the latest specialist equipment, and are located nationwide, enabling us to install and commission all types of fibre systems.

Our operational support teams are able to accommodate varying scale projects at any time, with planned and reactive flexible services. We are able to react quickly to any mission critical network incidents, providing business continuity.

We are able to react quickly to any mission critical network incidents, providing business continuity.

Electrical Services.

We provide an extensive range of electrical services from design to installation and planning.

From small installation and lighting works to full scale power infrastructure, Sudlows projects are tailored to our client's needs. We are committed to creating a streamlined service with expert input from our electrical engineers and team of project managers.

By installing the latest technologies throughout our works, we strive to provide the most sustainable, energy efficient electrical solutions for your business, from ambient light control systems to 'green' electrical designs. Our project managers perform a detailed assessment of your electrical infrastructure, highlighting areas where more energy efficient or innovative alternatives can be integrated.

With over 100 years' experience in the electrical industry, Sudlows can guarantee a comprehensive, reliable and innovative service within the restraints of your space, time and budget.

The combination of innovation, environmental awareness, technical excellence and global support make us the provider of choice.
