Solution Fire Stopping Programme

System Hilti Fire Stop Sealant

Duration 1 week

About

Bruntwood is a family-owned and run property company that specialises in creating the right environments for a wide variety of businesses to succeed. Bruntwood own over 117 properties across four UK city regions: Birmingham, Leeds, Liverpool and Manchester.

The Brief

As part of a programme of maintenance and refurbishment of the companies commercial property portfolio. Bruntwood approached Sudlows, as FIRAS certified installers, to identify and seal any new cabling points that required essential fire stopping implementation.

The Project

Sudlows were selected as the FIRAS certified contractors, who were qualified for the essential passive fire stopping programme at Bruntwood.

To overcome the more complex fire stop requirements, Sudlows worked closely with leading supplier Hilti who offered product specification, on site support with installation training, as well as engineering design for the non-standard applications. All Hilti products used are tested to both BS476 and the more rigorous European Technical Approval EN 1366.

Zachary Beacham, Building Surveyor at Bruntwood, said:

“Sudlows delivered outstandingly on all aspects of the Fire Stopping brief given and its reassuring that such essential project work is undertaken by certified contractors such as Sudlows. I look forward working with Sudlows on the next phase of our programme.”

Conclusion

FIRAS certification started in 1994 and has been instrumental in improving standards of installation of fire protection products and systems to the benefit of the construction industry and clients IT services.

FIRAS is a voluntary, third party certification for installation contractors of both passive and active fire protection systems and accredited by UKAS to BS EN 17065.

Andy Hanlon, Enterprise Services Director at Sudlows, said:

“The FIRAS certification is another valuable addition to our range of accreditation that ensure we are delivering a first-class service to our clients.”

“We look forward to working with our clients in raising awareness of this essential service and ensuring that we deliver the highest of safety standards in the industry.”
