

Critical Infrastructures.

Critical
Infrastructures

We provide first class technical services, built upon ability, delivered through excellence, right at the core of your business.

About us.

Sudlows is an award winning technical services specialist formed around 3 core divisions; Critical Infrastructures, Enterprise Services and Facilities Management. Founded in 1912 the company has been the provider of choice for M&E and IT Projects for over 100 years.

We are proud to employ the industry's most dedicated, talented and passionate staff to design and build creative, sustainable and energy efficient solutions. We believe in providing excellence across every aspect of the business and our team are at the core of this vision. Here at Sudlows we pride ourselves on our knowledge, dedication and quality, reflected through our awards, accreditations, associations and extensive client list.

Data Centres.

Our world class Uptime Institute ATD Technicians provide a high quality Audit, Design, Build and Maintenance service.

Sudlows are the UK's leading specialist in the audit, design, build and maintenance of energy efficient and sustainable critical infrastructure environments.

Sudlows data centre experts invest considerable time into the research and evaluation of both new and emerging products and technologies. We are committed to providing the most energy efficient and resilient solutions for mission critical environments.

The combination of innovation, environmental awareness, technical excellence and global support make us the data centre provider of choice. Our world class Uptime Institute ATD Technicians provide a high quality Audit, Design, Build and Maintenance service.

We provide a range of services including developing continuity plans, undertaking Gap Analysis to improve resilience and building new data facilities or upgrading existing ones.

Critical Power.

Sudlows are able to deliver innovative and creative technologies in order to provide reliable critical power solutions.

We source and install effective and resilient mission critical systems to provide instantaneous defence from power interruptions. With a dedicated team of electrical engineering specialists, Sudlows can ensure the protection and safety of core power infrastructures.

At Sudlows we believe an integrated, reliable and innovative back-up power system should be at the core of any critical environment. With over 100 years' experience, we are able to work with you from installation and design, through to management. As all projects and systems are unique, here at Sudlows we tailor and creatively design each critical power system to ensure the most resilient, cost effective and sustainable solution is delivered.

Sudlows can ensure the protection and safety of core power infrastructures.

Cooling and Air Conditioning.

We provide leading edge cooling solutions developed by integrating and enhancing innovative cooling technologies.

Sudlows provide reliable and resilient cooling solutions via a team of experienced mechanical engineers. We recognise the importance of maximising uptime in the critical space and can tailor a unique design to suit any critical environment.

With the client's design criteria and business goals in mind, Sudlows will develop a bespoke solution incorporating efficiency and resilience while maintaining a sustainable redundant design, future proofing the client's facility. We deliver environmentally friendly, energy efficient cooling solutions that ensure a sustainable and minimal carbon impact whilst adhering to latest EU directives on environmental goals and carbon reduction.

The combination of innovation, environmental awareness, technical excellence and global support make us the provider of choice.
